

Getting Close!

Dan Hoolihan, EMC Society Historian, believes he's getting close to finding the original "List" of petitioners who signed the actual petition that went to the Institute of Radio Engineers asking to form the Professional Group on Radio Frequency Interference (PGRFI). The petition was reviewed and found acceptable and the PGRFI was formed in October of 1957; fifty-one years ago. A few years later, this group became known as the EMC Society.

During his recent visit to the storage unit containing the documents of Leonard Thomas, Mr. Hoolihan discovered a hand-written list by Mr. Thomas. He believes this is the correct list of petitioners because it has the 326 signatures mentioned in the Society's 25th Anniversary Transactions on EMC article by Leonard Thomas, one of the first secretaries of the EMC Society. Mr. Hoolihan inputted the names into a computer and then had the computer alphabetize them. See if you recognize any names!
