Dear Heyno, dear all,

as a follow-up of our web-meeting I send, as suggestion, for the "Journal on Multiscale and Multiphysics Computational Techniques (J-MMCT)" the links which could be incorporated in the "2nd stop"-box that has been explained in the presentation of Heyno on slide 7:

1. For J-MMCT we can keep the bullet "Overview" and relate it to the link

<https://ieeexplore.ieee.org/xpl/RecentIssue.jsp?punumber=7274859>  
("J-MMCT on IEEEExplore")

and, if possible, additionally to the link

<https://ieee-jmmct.org/>  
("J-MMCT homepage")

2. For the content of the last issue of J-MMCT I we can keep the bullet "Content of the last issue" and relate it to the link

<https://ieeexplore.ieee.org/xpl/mostRecentIssue.jsp?punumber=7274859>

3. For J-MMCT we can keep the bullet "How to submit a paper?" and relate it to the link

<https://ieee-jmmct.org/information-for-authors/>

Incidentally, the corresponding page also contains a link to the IEEE Authors Center as well, as requested by Heyno.

4. As an additional fourth bullet I suggest "News and Highlights" and connect it to the link

<https://ieee-jmmct.org/news-and-highlights/>

Well, I think this already is sufficient, I hope. Heyno, please let me know any queries or comments you might have! Thank you also for the guidance and preparation of the slides. Personally, I really like the two-level box structure.

With best regards  
Frank
