ESA and R10 Chapters Activity Reports

How to Increase the Attractiveness of Technical Activities to Industrial Members

- 2012 Recommendations
 - Every Society should begin working on this problem if it has not already done so
- 2013 Focus on Chapter level activities
 - more likely to encounter members from industry at the chapter level

Findings

- There is a strong correlation between %-age of Chapter board members from industry and industry member attendance at Chapter meetings
- Societies with a higher percentage of industrial members tended to have a higher percentage of industrial member attendance at Chapter meetings

Interpretation

- Does having more industry membership on the Chapter boards attract more industry members to the meetings?

YES

- Does having more industry members at the Chapter technical meetings result in more industry members on the boards?

YES

- It's a virtuous circle: each factor begets the other
